SAVING YOU MONEY

Performance Guarantee

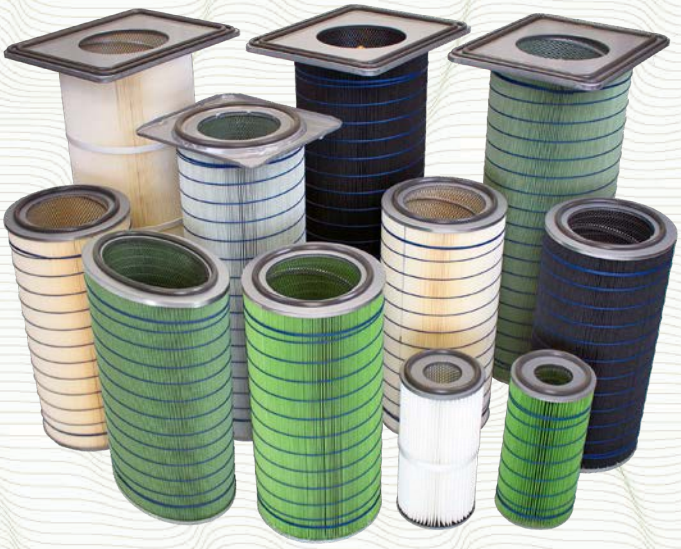
Dear Valued Customer:

Thank you for your consideration of our HemiPleat cartridge filter. HemiPleat has literally revolutionized the dust collection industry. We have helped customers all over the world extend the filter life in their existing cartridge–style dust collector by putting in HemiPleat filters.

The HemiPleat will
- run at a lower pressure drop (to save energy),
- meet or exceed current collection efficiencies,
- and last longer—or your money back.

It is a no risk trial. We have been able to extend the life of the filter in 99% of installations, so we are confident in extending this guarantee to you.

We guarantee that you will receive 30% more filter life than any competitors' filter by switching to a Camfil HemiPleat retrofit filter. If not, we will give you your money back in full.



Thank you,

Fredrik Westgård
President Camfil Americas
